

# SAFE SCHOOLS, GENDER FLUIDITY & PARENTAL RIGHTS

Written and Authorised by Julie Collins Tamworth NSW

Studies show that predominantly children who have Gender Dysphoria, in mid childhood, that is children who think they are the opposite sex of the body they are born in, cease to do so by early adulthood.<sup>1</sup>

Safe Schools Programmes, are sexualisation programmes, that groom children or encourage children into early ideation of sexual fantasy, normalising the idea of sexual behaviours from a very early age. The subject includes descriptions and links to websites that demonstrate how to masturbate at a very young age, both vaginally and anally with various paraphernalia.

I do not believe that neither Gender Fluidity nor Safe Schools Programmes should be allowed to be taught to children. Some of the material that is provided to children is blatant stereotyping of women and girls. For example in one book a girl is saying she wants to be a boy because she wants to play soccer!! A boy is pictured under a bed crying because he can't dance because he is a boy?

We women and men have fought long to break down the stereotypes and barriers that have prevented women from participating in what they enjoy doing to force these stereotypes upon our children.

In Victoria we have seen the rights of parents to counsel their children be removed. Australia what is happening to our nation?

I remember from my childhood, climbing trees hanging out with the boys playing football after school. No one was telling me because I did those things perhaps I was a boy. I was allowed to grow up and play without having to concern myself about whether I was a boy or girl in the wrong body.

Instead of having safe schools programmes, gender fluid toilets, and gender fluidity taught in schools; instead of removing parents rights to decide what their children should be allowed to participate in at school, or what parents can say to their children in the privacy of their own home, the Government and education department should be focusing on supporting parents in their right to parent children.

We need to see healthy ethics programmes taught long term in school. Why don't we put a long term programme together that addresses domestic violence, and appropriate conflict resolution? For some children the only healthy model they may get to see of conflict resolution will be outside the home.

We should be teaching from an early age respectful, healthy dynamics in relationship, boundaries, accepting differences. We need to teach that you don't have to like someone to treat them with respect and dignity. We need to be teaching Human Rights in child appropriate language. Then any person who identifies as transgender, homosexual, etc will

be treated with respect and dignity, because the next generation will understand the importance of valuing each other.

Yes again I will mention the Family Law Courts. We have seen orders made surrounding vaccination, and gender fluidity, and operations upon children. This is not the Family Law Courts place to interfere in families. The Family Law Courts should definitely not be making court orders allowing operations upon children to change their gender.

Child Legislated bodies should not be removing children from homes because the parents are trying to counsel their children with regard to gender.

Parents must have the right to raise their children in a loving safe environment. To allow their children to focus upon being a child not be indoctrinated.

We need parenting courses to be freely available to all parents who chose to do a course. Perhaps a programme such as Circle of Security should be mandatory for all parents to do prior to giving birth.

Let's equip our parents, not interfere in families, and allow our children to be children!

Vote 1 Julie Collins under the line, numbering the boxes up to 12 leaving the bigger parties out to see Sensible Solutions introduced through legislative change!

Vote 1 Julie Collins to protect our children and families!
